

## Table of Contents

<b>Welcome and Keynote Address .....</b>	<b>1</b>
Opening Address of the GG2002 Conference	
<i>I.N. Tziavos.....</i>	<i>3</i>
Closing Address of the GG2002 Conference	
<i>I.N. Tziavos.....</i>	<i>5</i>
Keynote Address: <b>Surveying the Planet an issue of gravity with great potential</b>	
<i>M. Vermeer.....</i>	<i>6</i>
<b>Session 1 – Gravimetry and Gravity Networks .....</b>	<b>14</b>
Analysis of the Results of the Sixth International Comparison of Absolute Gravimeters ICAG-2001	
<i>L. Vitushkin, Z. Jiang, M. Becker, O. Francis .....</i>	<i>13</i>
Absolute Gravity Measurements: A System by Itself	
<i>H. Wilmes, B. Richter, R. Falk .....</i>	<i>19</i>
UNIFIED EUROPEAN GRAVITY REFERENCE NETWORK 2002 (UEGN2002): A STATUS REPORT	
<i>A. Kenyeres, G. Boedecker, O. Francis.....</i>	<i>26</i>
Development of the Helicopter-Mounted Gravimeter and the Study of the Active Faults Running Across the Coastal Lines over the Continental Shelves	
<i>J. Segawa, E.J. Joseph, S. Kusumoto, T. Ishihara E. Nakayama, M. Satomura.....</i>	<i>30</i>
Plane Trajectory with GPS for Airborne Gravimetry	
<i>F. Duquenne, A.V. Olesen, J. Cali.....</i>	<i>34</i>
New Airborne Gravity Data Around Crete - First Results from the CAATER Campaign	
<i>A.V. Olesen, I.N. Tziavos, R. Forsberg.....</i>	<i>40</i>
PRECISE GPS-POSITIONING AND -ACCELERATION FOR AIRBORNE GRAVIMETRY: A CASE STUDY	
<i>G. Boedecker, C. Völksen, W. Wende, V. Böder, L. Wanninger, .....</i>	<i>45</i>
Downward continuation of airborne gravity data – an Arctic case story	
<i>R. Forsberg.....</i>	<i>51</i>
Bathymetric Data to Increase Resolution of Gravity Data	
<i>D. Sproule, A.H.W. Kearsley, R. Forsberg.....</i>	<i>57</i>
One Year of Repeated Measurements by the Absolute Gravimeter FG5 No. 215 and Calibration of Tidal Gravimeters by Absolute Gravity Measurements	
<i>V. Palinkas and J. Kostecky (jr.) .....</i>	<i>61</i>

An Improved Tidal Record at the Station Pecný with the Upgraded Gravimeter Gs15 No. 228 <i>J. Brož, Z. Šimon, J. Šimek</i> .....	66
A MVR Feedback Signal Calibration with the Gravimeter LaCoste & Romberg G 137 <i>V. Palinkas</i> .....	70
THE ABSOLUTE GRAVITY MEASUREMENTS PERFORMED BY SAKUMA IN FRANCE, REVISITED 20 YEARS LATER <i>M. Amalvict, N. Debeglia, J. Hinderer</i> .....	76
Determination and reliability estimation of vertical gradients based on test measurements. <i>G. Csapó and L. Völgyesi</i> .....	84
National Gravity System for Bulgaria <i>G. Milev, K. Vassileva, L. Stoyanov, V. Stoinov, G. Valev, E. Peneva, T. Tashkov, T. Belyashki, E. Mihailov</i> .....	90
<b>Session 2 – Precise Geoid Determination</b> .....	<b>95</b>
The ellipsoidal correction to Stokes's formula <i>L.E. Sjöberg</i> .....	97
The Eötvös spherical horizontal gradiometric boundary value problem - gravity anomalies from gravity gradients of the torsion balance <i>G. Tóth</i> .....	102
Green's Function and External Masses in the Solution of Geodetic Boundary-Value Problems <i>P. Holota</i> .....	108
The Estimation of Lateral Density Variations Using Gravity and Elevation Data: Its Application for Geoid Determination in Hungary <i>Sz. Rózsa</i> .....	114
Towards a Precise Geoid for Egypt <i>H. Abd-Elmotaal</i> .....	120
Estimation of High-Precision Marine Geoid Models Offshore Newfoundland, Eastern Canada <i>G.S. Vergos and M.G. Sideris</i> .....	126
OSGM02: A New Geoid Model of the British Isles <i>R. Forsberg, G. Strykowski, J.C. Illiffe, M. Ziebart, P.A. Cross, C.C. Tscherning, P. Cruddace, K. Stewart, C. Bray, O. Finch</i> .....	132
A Case Study of Different Modified Kernel Applications in Quasi-Geoid Determination <i>M.A. Silva, D. Blitzkow, C. Lobianco</i> .....	138
High Precision Geoid Determination of Austria Using Heterogeneous Data <i>N. Kühtreiber</i> .....	144
A Detailed Gravimetric Quasigeoid Model Vugtk 2002 for Central Europe <i>P. Novák, J. Šimek, J. Kostelecký (jr.)</i> .....	150

A Comparison of Some Existing Methods for the Computation of Terrain Corrections in Local Gravity Field Modelling <i>D. Tsoulis and I.N. Tziavos</i> .....	156
The Digital Zenith Camera - A New High-Precision and Economic Astrogeodetic Observation System for Real-Time Measurement of Deflections of the Vertical <i>C. Hirt and B. Bürki</i> .....	161
Improvement of the gravity field and geoid around Corsica by aerial gravimetry <i>H. Duquenne, A.V. Olesen, R. Forsberg, A. Gidskehaug</i> .....	167
Fitting a Gravimetric Geoid Model to the Australian Height Datum via GPS Data <i>G. Fotopoulos, W.E. Featherstone, M.G. Sideris</i> .....	173
The Influence of New Gravimetric Data on the Estonian Geoid <i>H. Jürgenson</i> .....	179
Determination of a Geometrical Geoid Profile Between the Mediterranean and the Black Sea by GPS-Leveling <i>A. Ustun, C. Demir, A. Kilicoglu, H. Demirel</i> .....	183
On the Construction Of a Synthetic Earth Gravity Model (SEGM) <i>M. Kuhn, W.E. Featherstone</i> .....	189
On the Optimal Spatial Resolution of Crustal Mass Distributions for Forward Gravity Field Modelling <i>M. Kuhn, W.E. Featherstone</i> .....	195
Precise Indonesian Gravity Field Determination from a Combination of Surface Gravity, Altimeter and Digital Terrain Model Data <i>L.S. Heliani, Y. Fukuda, S. Takemoto</i> .....	201
The Development and Evaluation of the Global Digital Topographic Model DTM2002 <i>J. Saleh and N.K. Pavlis</i> .....	207
A Gravimetric Geoid in Andalusia, Results and Precision Estimates <i>E.B. Blázquez, A.J. Gil, G. Rodríguez-Caderot, M.C. de Lacy, J.J. Ruiz</i> .....	213
Correction of Systematic Errors in the Surface Gravity Anomalies Using Satellite Gravity Solutions <i>M. Véronneau and J. Huang</i> .....	217
Data smoothing along a mountainous coastline for use in altimetry-gravimetry boundary-value problem solutions <i>R. Grebenitcharsky and M.G. Sideris</i> .....	223
The Analysis of Gravity Field Data in View of Sub-Decimetre Geoid in Poland <i>A. Łyszkowicz</i> .....	229
<b>Session 3 – Dedicated Gravity Satellite Missions</b> .....	<b>235</b>
A first attempt at time-variable gravity recovery from CHAMP using the energy balance approach <i>N. Sneeuw, C. Gerlach, D. Švehla, C. Gruber</i> .....	237

A Challenge to the Detection of Regional to Local Scale Ice Sheet Movements in Antarctica by the Combination of In-Situ Gravity Measurements and Gravity Satellite Data <i>Y. Fukuda, K. Shibuya, K. Doi, S. Aoki</i> .....	243
Analysis of surface gravity and satellite altimetry data for their combination with CHAMP and GRACE information <i>N.K. Pavlis and S.C. Kenyon</i> .....	249
Evaluation of Terrestrial Gravity Data by New Global Gravity Field Models <i>M. Roland and H. Denker</i> .....	256
Evaluation of the Quasigeoid Heights and the Gravity Anomaly from GOCE Satellite Gradiometry Mission <i>M.S. Petrovskaya, A.N. Vershkov, A. Łyszkowicz, J.B. Zielinski</i> .....	262
External Calibration and Validation of GOCE Gradients <i>J. Müller, F. Jerecki, K.I. Wolf</i> .....	268
Calibration of GOCE SGG data combining terrestrial gravity data and global gravity field models <i>J. Bouman and R. Koop</i> .....	275
An Alternative Concept for Validation of GOCE Gradiometry Results Based on Regional Gravity <i>R. Haagmans, K. Prijatna, O.D. Omang</i> .....	281
Computation of Gravity Gradients Over Europe for Calibration/Validation of GOCE Data <i>H. Denker</i> .....	287
<b>Session 4 – Satellite Altimetry</b> .....	<b>293</b>
A New Method Computing Vertical Deflections from Satellite Altimeter Data <i>L.F. Bao and Y. Lu</i> .....	295
Coastal Satellite Altimetry – Methods for Data Recovery and Validation <i>M.J. Fernandes, L. Bastos, M. Antunes</i> .....	302
Altimetry-Derived Marine Gravity Field Estimation Using Single- and Multi-Satellite Data <i>G.S. Vergos and M.G. Sideris</i> .....	308
Sea Surface Topography and Geostrophic Flow Estimation from Multi-Satellite Altimetry and Shipborne Gravity Data Using Low-pass Filtering and Wavelet Decomposition <i>G.S. Vergos, R.S. Grebenitcharsky, M.G. Sideris</i> .....	314
IMPACT OF NEW GRAVITY FIELD MISSIONS FOR SEA SURFACE TOPOGRAPHY DETERMINATION <i>T. Gruber and P. Steigenberger</i> .....	320
Comparison of Different Satellite Altimeter-Derived Gravity Anomaly Grids with Ship-Borne Gravity Data Around Australia <i>W.E. Featherstone</i> .....	326

Sea Surface Determination from Airborne Laser Altimetry over the Aegean Sea <i>A. Papafitsorou, H.-G. Kahle, M. Cocard, G. Veis</i> .....	332
 <b>Session 5 – Numerical Methods &amp; Integrated Processing of Heterogeneous Data .....339</b>	
Band-Limited Kernel Modifications for Regional Geoid Determination Based on Dedicated Satellite Gravity Field Missions <i>W.E. Featherstone</i> .....	341
Fast continuous mapping of the gravitational effect of the terrain or other sources <i>G. Strykowski</i> .....	347
Mapping of the free-air gravity anomaly using altimetric and marine gravity data <i>M.F. LeQuentrec-Lalancette, D. Rouxel, F. Hernandez, Ph. Shaeffer</i> .....	353
Estimation of Error Covariance Functions Using Gravity Gradiometry and Surface Gravity Data <i>D. Arabelos and P. Papapaskevas</i> .....	358
 <b>Session 6 – Vertical Datum Definition and Unification .....365</b>	
Defining the geoid by $W = W_0 \equiv U_0$ : Theory and practice of a modern height system <i>R.G. Hipkin</i> .....	367
Modelling of Differences of Height Systems in Switzerland <i>U. Marti</i> .....	378
Offsets between some local height datums in the South East Asia region <i>A. Kasenda and A.H.W. Kearsley</i> .....	384
Evaluation of Orthometric and Related Height Systems Using a Simulated Mountain Gravity Field <i>M.L. Dennis and W.E. Featherstone</i> .....	389
Progress Towards a Gravimetric Geoid for New Zealand and a Single National Vertical Datum <i>M.J. Amos and W.E. Featherstone</i> .....	395
Orthometric Heights from GPS: The integrated Approach <i>N. Hatjidakis and D. Rossikopoulos</i> .....	401
 <b>Session 7 – Geodynamics, Tides &amp; Temporal Gravity Variations.....407</b>	
RECENT VERTICAL MOVEMENTS OF THE NORTH-WEST BOHEMIA (CZECH REPUBLIC) FROM THE DATA OF VARIOUS ORIGIN <i>P. Vyskočil, A. Zeman</i> .....	409
LATERAL VARIATIONS FROM CAUSAL GRAVITY “SOURCES” WITHIN THE EARTH’S CRUST REVEALED BY AN OBSERVED GEOID <i>M.G. Dufexopoulou</i> .....	413

Repeated Absolute Gravity Measurements in the Western Yunnan and Tibetan Plateau, China <i>Y. Wang, H.T. Hsu, W.M. Zhang</i> .....	420
Temporal Variations in the Earth's Gravity Field From SLR and CHAMP GPS Data <i>M.K. Cheng, B. Gunter, J. Ries, D.P. Chambers, B.D. Tapley</i> .....	424
A reinterpretation of the Fennoscandian relaxation-time spectrum for a viscoelastic lithosphere <i>K. Fleming, Z. Martinec, D. Wolf</i> .....	432
<b>Author Index</b> .....	<b>439</b>
